Resolutions 2017

by Samina Iqbal

Promises. We make them. We break them.

Plans. We make them, but don’t pursue them.

Yet, we continue and love to set professional and personal goals and targets for ourselves and our families. There is no particular ‘right time’ for this exercise. Daily, weekly, monthly. However, with the arrival of every new year, we tend to review, renew, revise our pledges, and set new ones with vigour, and revitalise and rejuvenate ourselves trying to pick up the scattered pieces yet again and give direction to our lives and careers.

Resolutions 2017 is to engage the Institute’s members to share their promises to themselves with their peers. It is a reminder that we have another chance to fix up the wrong moves, finish undone jobs, and set new focus and direction. So what if we didn’t accomplish what we set out to? There is another day, another year, another chance… a new beginning. Like someone very aptly said: “Tomorrow is the first blank page of a 365 page book. Write a good one.” Happy 2017 to all.

However, not to forget that “Allah is the best of planners.” (Al-Imran [The Family of Imran]: 3:54; Al-Antal [The Spoils of War]: 8:30; Ar-Ra’d [The Thunder]: 13:42).

Here’s what the Institute members have promised themselves for 2017. Read on…

No show of emotions

Keeping my emotions to myself… Yes, my Resolution 2017 is to control display of my emotions in front of others, which I usually shared with people in the past. Sometimes, when I shared my joys, happiness, sad times, promotions, other important items publically, either by using social media or through general conversation, mostly I had to suffer bitter experiences and I realised that sharing such information publically did not give me any fruitful results, rather had to face problems, so I’ve decided in year 2017, InShaAllah, I will limit myself in respect of sharing my emotions with general public.

My fantastic 5 for 2017!
■ ‘I will try to be on good terms with Allah. I’ll try not to be very naughty!’
■ I will spend more time with my kids, helping them in their studies, teaching them all I know and inspiring them to learn all I never did. And of course I will spoil them more, perhaps dreadfully so that they could be themselves and follow their dreams.
■ I would be a good husband – giving more time to my wife and sharing household chores to ease her burden of juggling full time job with family.
■ I would strive to unlearn many lessons. I won’t let ethos dictate my beliefs anymore.
■ And I am aiming at adding more value at work by charging into 2017 with more gusto than ever before.’
Yasir (Hur) Khan, ACA (R-4476)
Senior corporate accountant, Visionary Investment Group, Sydney, Australia

Strive to my best version
■ ‘Achieving Excellence:
My new year resolution is to achieve professional competence by focusing on little things that sometimes prove to be critical success factors to growth and progression. In the words of Colin Powell: “If you are going to achieve excellence in big things, you develop the habit in little matters. Excellence is not an exception, it is a prevailing attitude.”

Better Work-Life Balance: My resolution for 2017 is to live a more balanced life. I feel that in the midst of the chaos, I lost the balance in my life and am neglecting the things that keep me sharp and productive. I plan to introduce a new routine that will help me maintain that balance, despite how chaotic things may get.
■ Visionary and strategic: My resolution is to leave some white space on my calendar each week to afford myself the time to be visionary and strategic.
■ Learn something new: Resolution 2017 is to learn something new that will add to my skills and add a new dimension to my life.
■ Give something back to the profession: I would like to find a cause and give back to the profession something that really matters.
■ Strive to be the best: My resolution is to transform to the best version of myself. I am strong supporter of the idea that by striving to do the impossible, man has always achieved what is possible.

By virtue of being ashraf-ul-makhloogat, we are blessed by Allah swt to decide our own vision unlike other creations in this universe. Once that vision is set and we have identified the purpose of our life, then we work to achieve it. And this is when we form goals and targets. In order to achieve my long term vision, I have set my goals and targets for 2017 which are as under:

The Ordinance was promulgated on November 11, 2016 to strengthen the supervisory and adjudicatory ambit of the SECP and in turn work towards a better corporate culture, for promoting the business environment of Pakistan.

A large number of learned speakers and experts attending the forum highlighted the important aspects of this new regulatory framework for businesses. The key stakeholders observed that the new ordinance will attract fresh ventures, by eliminating unnecessary and cumbersome requirements. Some adverse and tedious regulations were previously enforced through the Companies Ordinance, 1984, which were becoming a reason for hindrances in the economic growth of the country by discouraging fresh investments.

They went on to share examples of how in some organisations decision making ignoring ethical values, both, conscious or unconscious, is becoming a common practice. Brief activities were conducted involving the participants to give them a better understanding of the path leading to decision making based on ethical values.

After a two hour presentation, mementos were presented to both speakers as a gesture of appreciation by Abdul Rab, FCA, chairman SRC, followed by closing remarks and vote of thanks. The seminar ended with hi-tea.

The Institute of Chartered Accountants of Pakistan (ICAP) arranged an exclusive meet-up with the leading professionals from the corporate sector on November 24, 2016 at PC Lahore. The ICAP president Nadeem Yousuf Adil was the chief guest. The event was largely attended by leading businessmen, top executives, representatives of public sector and senior CAs.

The ICAP VP-South Khalilullah Shaikh briefed the audience about the recent initiatives of the Institute in general, and those related to industry in particular. He explained that accountancy, deemed as one of the oldest professions, has witnessed most changes in the business environment, some triggered by technology, complexities and changing economies while some triggered as consequences of accounting failures. ICAP, being the flag bearer of accounting profession in Pakistan, has been promptly responding to the changed environment focusing on some major initiatives, such as improved focus on professional accountants in business and industry, mid-tier certification and industrial training.

It was further explained that ICAP considers industry as its important stakeholders and believes that better industry contributes in building better society. ICAP, that already had strong footprints in top-tier management of industry, has further increased its connectivity with the industry. ICAP launched CFO conferences, National Finance Olympiad and Best Corporate Report awards in order to engage directly with the industry.

Introducing a historic decision of the Institute Khalilullah Shaikh said at the event that the Institute has decided to recognise its capable students who have completed the required practical training and passed a significant part of advanced stage of CA qualification by awarding them the ‘Professional Accounting Affiliate’ status.

The holder of this certificate will become an officially recognised part of the Institute's professional family and
would be entitled to use the designation of 'Professional Accounting Affiliate' or 'Affiliate.' He said that all those who have completed the specified papers of Final level examinations and practical training under the bye-laws would be eligible for the scheme.

Khalilullah explained the rationale that formed the basis for another landmark decision, the industrial training, stated that modern industry is now capable of providing the required diversity and depth, complexity of businesses demands specialisation more than diversification and industry exposure is most relevant exposure for career in business. This stream would bring growth of accountancy profession, create opportunities and industry would be benefitted by hiring highly committed and technically sound resources.

The president ICAP in his closing address stated that this initiative would enable other business graduates already working in industry to join the profession while continuing their jobs. The trainees once qualify would be highly valuable resource, having relevant knowledge, entity specific skills and effectively contribute in value creation for business and economy.

The president also distributed certificates to ICAP industrial training partners i.e. Adamjee Insurance Company Limited, Maple Leaf Cement Factory Limited, Nishat (Chunian) Group and Sui Northern Gas Pipelines Limited. The corporate meet-up was followed by a photo session and lunch.

He thanked the Pakistan Embassy and Saudi Organisation for Certified Public Accountants (SOCPA) for their
continued support and patronage. The president also praised the efforts of all committee members.

Apart from the normal business of approval of annual report, the members were also informed about the ongoing discussions with Overseas Coordination Committee (OCC) and the Council regarding the restructuring issues of Overseas Chapter of ICAP members in KSA. Iqbal informed the members that since inception activities of the Overseas Chapter of ICAP members in KSA, though being an unregistered body in KSA, were conducted with the implied support of SOCPA and Pakistan Embassy in KSA. Considering the local sensitivities of such activities, the Management Committee decided to seek the guidance of ICAP OCC and Council in March 2016.

Muhammad Iqbal informed that he has decided to resign on his personal accord and was presiding the AGM as the last task in his tenure. However, VP Muhammad Asif Iqbal stated that the resignation of Muhammad Iqbal is yet to be accepted and that the Management Committee will discuss this in meeting soon and also seeks the advice of OCC.

The AGM was followed by a family event which was attended by more than 250 participants.

In the days following the AGM, Muhammad Iqbal decided to withdraw his resignation on the advice of Management Committee of Overseas Chapter of ICAP members in KSA, ICAP OCC and the office bearers of ICAP. The Management Committee is thankful to Muhammad Iqbal for taking this important decision in the larger interest of ICAP. Special thanks is also due to all ICAP members in KSA particularly the AGM participants, the ICAP OCC and office bearers for extending their full support in resolving this important and sensitive matter amicably.
Recognising the continuing needs of the members and other finance professionals to keep them abreast with the recent developments in corporate and legal framework of the Gulf Cooperation Council (GCC) Region, a workshop on the topic of **Implementation of Value Added Tax – Introduction, Fundamentals and Key Industry Issues**, was held on November 30, 2016, at Hilton Garden Inn Hotel, Riyadh, Kingdom of Saudi Arabia (KSA).

The workshop was conducted by Mobeen Khadir and George Campbell who are senior tax professionals from Deloitte & Touche Middle East, and are based in Bahrain. Mobeen is an international Mergers & Acquisitions (M&A) Tax director in Deloitte and has an extensive experience as a corporate and tax lawyer in Australia and the Middle East. He is also a part of the Value Added Tax (VAT) implementation team in Bahrain and Saudi Arabia. His key areas of tax expertise are tax structuring, Saudi tax, international tax, transaction taxes and VAT in the GCC. George Campbell has also a significant experience in providing indirect tax consulting services across all industry sectors. His experience includes advisory work for residential and commercial real estate developers, beverage producers, and large manufacturing organisations, as well as local government and other public sector organisations.

The main objective of the seminar was to update and enhance the participants’ knowledge and understanding of the principal features and issues relating to the implementation of VAT in the GCC Region effective from January 1, 2018 as per a decision of the Supreme GCC Council. The seminar aimed at realising the accounting professionals that there is now a short timeline for businesses to begin building awareness in their organisations, and consider the potential implications from a financial and compliance perspective. The seminar helped them realise that businesses can begin awareness building and conduct impact assessments and trainings to consider the likely impacts of VAT on working capital, cash flow, and margin. They can also commence transaction mapping exercises to understand their business flows in advance of the VAT law being issued. They should be ready to comply with the legal provisions of the VAT law to their own circumstances, which will accelerate the potential technology changes required in IT systems and resource planning.

The workshop was greatly applauded by the participants as a useful event addressing the practical understanding of the GCC VAT regime and its potential implications. At the conclusion, Safwat Khalid, chairman CPD Committee Riyadh, presented a vote of thanks to the guest speaker and participants on behalf of the Overseas Chapter of ICAP members in KSA.

The workshop was attended by over 75 ICAP members and accounting professionals. The event ended with a sumptuous dinner in the honour of speaker and guests.

Both the presentation and the pictures are available on Overseas Chapter of ICAP members in KSA website.

New Interpretation on Foreign Currency Transactions and Advance Consideration

The International Accounting Standards Board (IASB) has published IFRIC 22 Foreign Currency Transactions and Advance Consideration to clarify the accounting for transactions that include the receipt or payment of advance consideration in a foreign currency.

It does not apply when an entity measures the related asset, expense or income on initial recognition at fair value or at the fair value of the consideration received or paid at a date other than the date of initial recognition of the non-monetary asset or non-monetary liability. Also, the interpretation need not be applied to income taxes, insurance contracts or reinsurance contracts.

The interpretation addresses foreign currency transactions or parts of transactions where:
- there is consideration that is denominated or priced in a foreign currency;
- the entity recognises a prepayment asset or a deferred income liability in respect of that consideration, in advance of the recognition of the related asset, expense or income; and
- the prepayment asset or deferred income liability is non-monetary.

The date of transaction, for the purpose of determining the exchange rate, is the date of initial recognition of the non-monetary prepayment asset or deferred income liability. If there are multiple payments or receipts in advance, a date of transaction is established for each payment or receipt.

IFRIC 22 is effective for annual reporting periods beginning on or after January 1, 2018. Earlier application is permitted.

On initial application, entities apply the interpretation either retrospectively in accordance with IAS 8 or prospectively to all foreign currency assets, expenses and income in the scope of the interpretation initially recognised on or after the beginning of the reporting period an entity first applies the interpretation in or the beginning of a prior reporting period presented as comparative information.
Amendments to IAS 40 to Clarify Transfers of Property to/from Investment Property

The IASB has published amendments to IAS 40 Transfers of Investment Property (Amendments to IAS 40) to clarify transfers of property to, or from, investment property. This clarifies whether a property under construction or development that was previously classified as inventory could be transferred to investment property when there was an evident change in use. The amendments are:

- Paragraph 57 has been amended to state that an entity shall transfer a property to, or from, investment property when, and only when, there is evidence of a change in use. A change of use occurs if property meets, or ceases to meet, the definition of investment property. A change in management’s intentions for the use of a property by itself does not constitute evidence of a change in use.
- The list of evidence in paragraph 57(a) – (d) was designated as non-exhaustive list of examples instead of the previous exhaustive list.

The amendments are effective for periods beginning on or after January 1, 2018. Earlier application is permitted. An entity applies the amendments to changes in use that occur on or after the beginning of the annual reporting period in which the entity first applies the amendments. Retrospective application is also permitted.

Ways to Plan Your Happiness

We put money in our 401(k)s. We take calcium supplements. We exercise. We hope these precautions will protect us as we age. But as we safeguard our money, bones and blood pressure, we forget to safeguard the one thing that can make a difference in the quality of our lives as we get older: our happiness.

Here’s how to start planning for your happy future:

1. Create meaning.
2. Be specific.
3. Prevent regret.
4. Be a work in progress.
